PROFESSIONAL SUMMARY

Results-driven Full-Stack MERN Developer with 2.9 years of professional experience building scalable, high-performance web and desktop applications. Proficient in Node.js, Express.js, React.js, MongoDB, Socket.io. Delivered end-to-end solutions spanning subscription platforms, real-time chat systems, and cross-platform desktop apps. Adept at writing clean, maintainable code, optimizing database performance, and integrating third-party payment and cloud services.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Node.js

Frontend: React.js, Electron.js, HTML5, CSS3

Backend: Express.js, RESTful APIs, Socket.io, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MongoDB (indexing, aggregation pipelines), MySQL

Caching & Queuing: Redis (session & data caching), RabbitMQ (async task queuing & event-driven messaging)

Cloud & DevOps: AWS (S3 bucket store images), Docker (containerization), CI/CD Pipelines (GitHub Actions), Git, GitHub

Payments: Razorpay, RevenueCat (cross-platform subscription management)

Tools: VS Code, Postman, Swagger, Sharp (image compression), AWS S3, fs module

PROFESSIONAL EXPERIENCE

Full Stack MERN Developer | Maticz Technologies Pvt. Ltd., Madurai, TN

Aug 2023 – Apr 2026

End-to-end full-stack developer responsible for API architecture, database design, and React.js integration across two major product lines: a subscription-based car wash platform and a real-time scrap marketplace.

Backend & API Development

- Developed scalable RESTful APIs using Node.js and Express.js handling high concurrent users.
- Implemented JWT authentication and role-based access control (RBAC) for secure applications.
- Designed subscription-based platform with automated scheduling and real-time tracking.
- Built real-time marketplace with bidding system using Socket.io.
- Optimized MongoDB queries using indexing and aggregation pipelines improving performance.
- Integrated Redis caching to reduce database load and improve response time.
- Implemented RabbitMQ for asynchronous processing and event-driven architecture.
- Managed file storage using AWS S3 with secure pre-signed URLs.
- Developed real-time chat system with message persistence and media sharing.
- Built cross-platform desktop app using Electron.js.
- Integrated Razorpay payment gateway and subscription services.

Real-Time Systems & Desktop

- Engineered a real-time one-to-one and group chat system using Socket.io with MongoDB-persisted message history, unread counts, and media file sharing.
- Developed a cross-platform desktop application using Electron.js wrapping the React.js frontend, deployable on Windows, Linux and macOS from a single codebase.

Frontend & Payment Integrations

- Integrated all backend APIs with the React.js Admin Panel and public promotional website.
- Implemented Razorpay payments, and RevenueCat for cross-platform subscription.

PROJECTS

Car Wash Subscription Platform

Multi-role subscription platform with automated serviceman scheduling, real-time status updates, Razorpay recurring billing, and subscription states for low-latency access.

Scrap Marketplace with Real-Time Bidding

Marketplace for scrap listing and vendor bidding in real time. Keeping API response times fast even under bidding spikes.

Real-Time Group Chat System

One-to-one and group messaging with persistent history, read receipts, and image sharing. Redis tracks active sessions; Sharp compresses images server-side before AWS S3 upload.

Cross-Platform Desktop Application

Desktop application wrapping a React.js frontend via Electron.js, with native OS notifications and file-system access.

EDUCATION

Bachelor of Science in Computer Science

2019 – 2022

Sourashtra College, Madurai, Tamil Nadu

CGPA: 8.4
